

Fence and Interior Space Materials

Fence will be redwood or cedar constructed in a board-on-board style similar to other fences in our development. Travertine and grass will be on the interior, no concrete. I can send photos of the fencing material once our landscaper obtains them. Below is a picture of the travertine laid down on top of base rock.

View of Home Front Door/Driveway and Retaining Wall on Other Side of Property

The retaining wall on the other side of the property matches the existing retaining wall exactly except it is shorter in height. I forgot to take a photo before the sun went down today but can send one tomorrow if needed.

View of Side of Home with Exposed Garage Side Door

Aerial View of Property

The empty lot to the north is the community park. Interestingly enough, some of our neighbors on Rainbow Crow have front elevations that begin less than 10 feet from the sidewalk.
